New QUQUQ camping box for the Ineos Grenadier

A customised box from camping specialist QUQUQ is now available for the Ineos Grenadier. The "GrenBox" follows the proven QUQUQ principle and offers a comfortable bed as well as a fully equipped kitchen with a 2-burner cooker, 20 litres of fresh water, generous storage space and a practical storage area - all in a single module. The robust box can be installed in just a few simple steps so that you are always ready for your next off-road tour.

The bed has a lying surface of 120 x 190 cm with a comfortable 10 cm thick cold foam mattress. It can be folded out in one simple movement and hooked onto the front seats, making it available in just a few seconds without the need for any further rearranging. The self-supporting folding frame even allows the rear seats to be removed to create additional storage space under the bed.

The kitchen has a well thought-out and functional design and is ready for immediate use. An integrated aluminium wind-screen ensures that cooking is efficient and, thanks to the two hobs, you are not limited to soups and stews. Cooking utensils and food can be stored underneath the hob and in the centre storage compartment. The front flap of the box offers a generous storage area of 102 x 38 cm - enough space to prepare meals or have breakfast without having to set up a table. The fresh water canister is accessible at all times and works reliably without electricity.

QUQUQ has been manufacturing mobile camping modules for a wide range of vehicles for 13 years, allowing daily drivers to be converted into campers quickly and easily. The focus is on a stable design and good comfort, combined with quick and easy handling. As much as necessary, as little as possible is the principle behind the boxes manufactured in Germany.

The boxes have proven their suitability for use on demanding off-road journeys with vehicles such as the Defender 110, Mercedes G or Toyota Land Cruiser. Customer experience confirms that you always sleep well protected and comfortably in the vehicle, even in harsh weather conditions.

The QUQUQ GrenBox is now available to order and will be delivered in June.

Testers wanted! We are happy to provide a test box for editorial purposes and reviews. Please contact us at: presse@ququq.info

The company QUQUQ GmbH & Co. KG

In 2011, QUQUQ invented the all-in-one campingbox, which combines kitchen, folding bed and storage space in a single module, making it a pioneer in the field of mini campers. The patented campingboxes are handmade in Germany from high-quality materials. There are now nine models with which around 150 different vehicles can be equipped. QUQUQ has always remained true to the principle of a flexible camping unit that can be inserted into an everyday vehicle in a matter of minutes if required.
